 REMARKS An evaluation of this report is requested from Army

25X1X

SOURCE

1. Between 20 and 26 March 1951, an undetermined number of Polish troops armed with submachine guns and mortars were seen marching through Kutno (Q 53/Q 39). During the same period, an undetermined number of boxcars equipped for the transportation of troops were sidetracked at Poznan (P 53/X 26).
2. Between 30 March and 4 April, the following observations were made:
 - a. A Polish troop train of 5 boxcars carrying troops, and several flatcars carrying 12 canvas-covered armored vehicles was seen passing through Nekla (P 53/X 56) and proceeding toward Warsaw.
 - b. From 3 to 10 Polish radio trucks were observed at Minsk-Mazowiecki (R 53/L 33), apparently involved in a field exercise.
 - c. A train of about 60 axles was loaded with Polish troops in Malaszewicze (S 53/L 77). Since the troops had numerous horses with them, source believed that they belonged to a cavalry unit.
 - d. Construction work was being done in the barracks installation near the Lowicz (Q 53/P 27) railroad station.
 - e. A camp of about 80 tents quartering members of the Polish State Youth Organization was observed at Reppen (O 53/V 84).
3. Three completed multiple-story buildings, two garages, and a service station were under construction west of the fuel depot at Warsaw-Powazki between 4 and 10 April.
